How to Create a Gutenberg Block if You Know Nothing

📍 [Include CSS and JS](#)

📍 [Components](#)

📍 [registerBlockType\(\)](#)

I want to begin with some kind of intro. Let's suppose guys, that you have some experience with builders, like... (I do not want to call their names). Do you remember how all the builders work? With the help of shortcodes, right?

It is a shortcode in a shortcode in a shortcode in a shortcode! 🤪

But what is a shortcode? It is PHP code, right? The first mistake with Gutenberg might be thinking that its blocks are something like shortcodes.

Что меня ждало?

1. Всѣ сломалось

Classic Editor

Активен

[Детали](#)

Включает предыдущую "классическую" версию редактора и экран редактирования записей в старом стиле, с TinyMCE, полями метаданных и прочим. Поддерживает все плагины расширения старого редактора.

4. Заголовки

Do You Need a Plugin for it?

Not sure if many of you need this functionality as a plugin. I didn't find any good solutions, so I can create a plugin for you something like this:

```
<h2 id="test">  
    Заголовок  
    <a href="#test">#</a>  
</h2>
```

Title – 53

WordPress Multisite – Publish Posts to Multiple Blogs

Description – 97

In this tutorial I will show how to post to all sites in your WP Multisite network automatically.

<https://rudrastyh.com/gutenberg/plugin-sidebars.html>
<https://rudrastyh.com/gutenberg/plugin-sidebars-with-php.html>

6. Изображения на всю ширину

Mar 28th, 2019 / [3 comments](#)

Here is a screenshot how I did it for WordPress default TwentySeventeen theme. You can also download [my child theme](#) with the ready code.

Below I will guide you step by step how to implement it on your own WordPress Multisite Network.

Load More Posts with AJAX for WordPress Multisite

Here is a screenshot how I did it for WordPress default TwentySeventeen theme. You can also download [...](#)

The screenshot shows the WordPress Multisite dashboard for a site named 'Misha Test'. The top navigation bar includes 'My Sites', 'Misha Test', 'Customize', '18', '0', and '+ New'. The user is logged in as 'Howdy, Misha'. The main content area displays a post titled 'Hello world!' dated 'MARCH 25, 2019' for 'SITE ID #1'. Below the title is a large image of a person in winter gear on a snowy mountain. At the bottom, a message reads: 'Welcome to WordPress Multisite. This is your first post. Edit or delete it, then start blogging!'.

```
add_theme_support( 'align-wide' );

Create a Payment Gateway Plugin for WooCommerce

📌	B	🔗	⏏	⋮
📌	Step 1. Create a plugin			
📌	Step 2. WC_Payment_Gateway			
📌	Step 3. Add your plugin options			
📌	Step 4. Credit card form with validation			
📌	Step 5. Process payments			

Before we begin this tutorial, if you need WooCommerce payment plugin development, please [contact me](#), me and my team will be happy to help 🚀

Step 1. We begin with creating a plugin

Step 1. We begin with creating a plugin

When I first heard about plugins for Wordpress I thought it is so hard to create one. But actually, to create a plugin you just need to create a file and add a couple lines of code inside it.

So, in the `plugins` folder I created `misha-gateway.php` file and added the following code there. In case your plugin will have more than one file, place it in the folder with the same name, example: `misha-gateway/misha-gateway.php`.

```
<> ⋮ misha-gateway/misha-gateway.php .  
  
<?php  
/*  
 * Plugin Name: WooCommerce Misha Payment Gateway  
 * Plugin URI: https://rudrastyh.com/woocommerce/payment-gateway-plugin.html  
 * Description: Take credit card payments on your store.  
 * Author: Misha Rudastyh  
 * Author URI: http://rudrastyh.com  
 * Version: 1.0.1  
 *  
 */
```

Once you did it, the plugin will appear in your admin area! And you can even activate it.

9. Не хватает КНОПОК

- Once you get the order object with `wc_get_order()` function, you can use its methods like `get_billing_first_name()`, `get_billing_country()`, `get_billing_address_1()` etc to get the customer billing and shipping details (by the way you can find all the methods in `includes/class-wc-order.php` which is in WooCommerce plugin folder). You can also get the billing details from `$_POST` array, at the moment of writing this tutorial I'm not sure what is better.
- You can add notes to the order with `$order->add_order_note()` method, it can be notes to customer (will be displayed in member's area) and private notes (only on edit order pages).
